## Pre-Anesthetic Testing Consent Form

Last Name: \_\_\_\_\_ Pets Name: \_\_\_\_\_ Date: \_\_\_\_\_

*Please read carefully and sign.*

Your pet is scheduled for a procedure that requires anesthesia. We would like to take this opportunity to recommend pre-anesthetic testing and explain why it is important to the health of your pet.

Like you, our greatest concern is the well being of your pet. Before placing your pet under anesthesia, a veterinarian will perform a complete physical examination to identify any existing medical conditions that could complicate the procedure and compromise the health of your pet.

Because there is always the possibility a physical exam alone will not identify all of your pet's health problems, we strongly recommend a pre-anesthetic profile (a combination of tests) be performed prior to anesthesia. The tests we recommend are similar to and equally as important as those your own physician would run if you were to undergo anesthesia.

It is important to understand that a pre-anesthetic profile does not guarantee the absence of anesthetic complications. It may, however, greatly reduce the risk of complications as well as identify medical conditions that could require medical treatment in the future.

**Level 1** The combination of tests we recommend for your pet **below 6 years old** are listed below.

BUN	Creatinine	ALKP	Price \$ 75.00
ALT	Glucose	Total Protein	
Electrolytes	Hematocrit	EKG	

**Level 2** The combination of tests we **require** for your pet **6 years and older** are listed below.

BUN	Creatinine	ALKP	Price \$ 105.00
ALT	Glucose	Total Protein	
Albumin	Total Bilirubin	Phosphorus	
Amylase	Cholesterol	Calcium	
Electrolytes	Hematocrit	EKG	

\_\_\_\_\_ Please complete the recommended testing prior to administering anesthesia to my pet.  
 If abnormalities are found, contact me at this number:

\_\_\_\_\_  
 Signature of Owner Phone Number for contact today

\_\_\_\_\_ I decline the recommended pre-anesthetic tests at this time and request you proceed with anesthesia. I understand that a medical condition may exist which would be impossible to identify during a physical exam alone. I understand that my pet's health could be at risk if such a condition goes undetected when my pet is placed under anesthesia.

### Identification Chip

The leading cause of death for our pets is getting lost without identification. The ID Chip is the professional and modern way to identify your pet and it has proven to be safe and effective. The microchip is painlessly injected under the skin and offers real protection that cannot fade or fall off. The cost of the chip is only \$50.00 if done at this time, plus the registration fee of \$17.00 which we will fill out and mail with the registration form.

\_\_\_\_\_ Yes, I want my pet protected with an ID Chip

\_\_\_\_\_ No, I do not want my pet protected with an ID Chip

### Pain Management

Pain medication has been proven to be very important in assisting with the well being and recovery of your pet from surgical procedures. All animals in which it is deemed necessary will receive the appropriate pain medication at a cost of \$40 to \$60 per day.
